

3**Water Event**

International whaling restrictions have increased to full protection for all whale species. The increased restrictions guarantee survival of almost all whale species.

**3****Air Event**

Composite material technology advances. New jet engines are lighter and more fuel-efficient, reducing the amount of fuel needed by the air transportation industry.

**Land Event**

The land requirements of the selected species are now closed. If this is the last set of requirements remaining on the species the species is saved. This card cannot be interrupted.

**3****Land Event**

Community leaders organize suburban wilderness projects creating plots of undisturbed land on every block through the donations of local residents.

**Special Event**

Light bulb technology advances. New LED light bulbs are 10x more efficient creating less pollution. Select a species to save. Place all event cards on this species in your hand. Discard down to the hand limit if necessary.

**1****Air Event**

Solar panel technology advances. New highly efficient solar panels can run at 80% efficiency. Increased use of solar panels lowers the consumption of fossil fuels.

**2****Air Event Interrupt**

Household gardens increase in popularity having a positive affect on the atmosphere and lowering demand for food transportation.

**Ultimate Block Interrupt**

Choose a target action event (red) or special event (orange), Ultimate Block blocks the effect of the targeted card. Ultimate Block counts as both a special event and an action event.

**5****Air Event Interrupt**

Combustion engine technology advances. New cars now produce cleaner emissions.
